Professional Summary

Results-driven Software Engineer with 4+ years of experience designing, building, and deploying scalable web, mobile, and enterprise applications across the full stack. Skilled in JavaScript, TypeScript, React.js, and Node.js, with proven delivery on AWS and Azure cloud environments and Odoo ERP systems. Adept at owning features end to end, leading UI modernization efforts, and translating business requirements into reliable technical solutions. Recognized for strong problem-solving, clean code practices, and effective collaboration within Agile teams.

Technical Skills

- Frontend — React Native, React.js, Next.js, Redux, HTML5, CSS3, Tailwind CSS
- Backend — Node.js, Express.js, REST APIs, FastAPI, Odoo ERP
- Cloud & DevOps — AWS (EC2, S3, deployment pipelines), Docker, Git, CI/CD
- AI & Tooling — OpenAI, Claude, GitHub Copilot, Cursor, Gemini
- Databases — MySQL, MariaDB, MongoDB, PostgreSQL
- Languages — JavaScript, TypeScript, Java, Python
- Methodologies — Agile, Scrum, Test-Driven Development (TDD)

Professional Experience

Software Engineer · PowerX, *Sri Lanka* *Feb 2026 – Present*

- Develop and customize Odoo ERP modules across inventory, HR, and operations workflows, translating business requirements into reliable, maintainable features.
- Deploy and maintain production applications on AWS, managing EC2 instances, S3 storage, and automated deployment pipelines to ensure high availability and faster releases.
- Design and build REST API integrations connecting Odoo with third-party services, eliminating manual data entry and improving cross-system accuracy.

Associate Software Engineer · Eventistry, *Sri Lanka* *Nov 2023 – Jan 2026*

- Delivered end-to-end product features on tight deadlines in a fast-paced startup, consistently shipping within sprint commitments.
- Refactored and upgraded application modules to improve performance, stability, and overall user experience.
- Worked closely with designers and product owners to translate requirements into clean, well-tested implementations.

Associate Software Engineer · Emageia, *Sri Lanka* *Oct 2021 – Jun 2023*

- Analyzed requirements and designed the logic for new features, stored procedures, and automated tests to ensure correctness.
- Evaluated and integrated third-party libraries to meet client requirements while balancing performance and project constraints.

- Authored code fixes and enhancements for inclusion in future releases and maintenance patches.

Software Engineer Intern · Emageia, *Sri Lanka* *Apr 2021 – Sep 2021*

- Contributed to code reviews, upholding quality standards and consistent coding conventions across the codebase.
- Researched emerging technologies and tools, recommending those that improved developer productivity on active projects.
- Provided technical support to customers, diagnosing and resolving software issues efficiently and professionally.

Projects

SFL 360 — Mobile Application | React Native, Redux, Tailwind CSS

- Engineered a real-time chat infrastructure leveraging WebSocket connections and an optimized React Native UI, resulting in sub-100ms message delivery latency.
- Architected a scalable search mechanism and data filtering layer to maximize content discoverability and reduce query lookup overhead.
- Centralized application global styling by creating a unified design theme configuration file, dropping UI component development times for subsequent sprints

Workshiftly — SaaS HR Management Application | React.js, Node.js, MariaDB

- Spearheaded a complete system-wide frontend architectural revamp using React.js to improve cross-browser rendering speeds and core web vital responsiveness metrics.
- Optimized secure media upload pipelines and processing workflows, streamlining multi-format document storage and file system lookups.
- Developed custom, high-throughput tabular report exporting scripts handling complex MariaDB dataset serialization natively.

HCIM Pulse — HR Management Web Application | React.js, Redux, Node.js, MariaDB

- Designed and implemented an interactive analytics dashboard consolidating complex workforce metrics into lightweight, cached API endpoints.
- Constructed dynamic, schema-agnostic CRUD operations using custom relational database models to extend system schema flexibility.
- Built asynchronous reporting and analytical data generation features to reduce browser-side main thread processing load.

Education

BSc in Physical Science — University of Kelaniya *2018 – 2021*

- Major: Computer Science, Pure Mathematics, Applied Mathematics · GPA 3.68 (Second Class Upper Division)

Core Competencies

- Effective Communication
- Problem-Solving
- Time Management
- Critical Thinking
