PROFESSIONAL SUMMARY

Full-stack Software Engineer with 5+ years of experience building and shipping web, mobile, and enterprise applications with JavaScript, TypeScript, React.js, React Native, and Node.js. Currently developing Odoo ERP modules and third-party integrations, and running production workloads on AWS. Track record of owning features end to end, leading frontend modernization, and turning business requirements into reliable, well-tested software within Agile teams. Uses AI-assisted development tools (Claude, Copilot, Cursor) to ship faster without compromising code quality.

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, Python, Java, SQL
Frontend	React.js, Next.js, React Native, Redux, HTML5, CSS3, Tailwind CSS
Backend	Node.js, Express.js, FastAPI, REST APIs, WebSockets, Odoo ERP
Databases	PostgreSQL, MySQL, MariaDB, MongoDB
Cloud & DevOps	AWS (EC2, S3), Docker, CI/CD pipelines, Git
AI & Tooling	OpenAI API, Claude, GitHub Copilot, Cursor, Gemini
Practices	Agile/Scrum, Test-Driven Development (TDD), Code Review, Clean Code

PROFESSIONAL EXPERIENCE

Software Engineer
Feb 2026 – Present

PowerX Technology · Sri Lanka

- Translate stakeholder requirements into technical designs and custom Odoo modules (Python, XML, PostgreSQL).
- Own features end to end, from development and testing to production release, in an Agile team.
- Manage AWS infrastructure and troubleshoot live systems to keep client ERPs stable and available.

Associate Software Engineer
Nov 2023 – Jan 2026

Eventistry · Sri Lanka

- Owned end-to-end product features in a fast-paced startup, consistently shipping within sprint commitments.
- Refactored core modules to improve performance, stability, and user experience.
- Partnered with designers and product owners to deliver clean, well-tested implementations.

Associate Software Engineer
Oct 2021 – Jun 2023

Emageia · Sri Lanka

- Designed feature logic, database stored procedures, and automated tests from client requirements.
- Evaluated and integrated third-party libraries, balancing performance and project constraints.
- Delivered fixes and enhancements for scheduled releases and maintenance patches.

Software Engineer Intern
Apr 2021 – Sep 2021

Emageia · Sri Lanka

- Took part in code reviews and researched tools that improved team productivity.
- Diagnosed and resolved customer-reported software issues.

KEY PROJECTS

WPU ERP — Odoo ERP for Western Pacific University

Odoo · Python · PostgreSQL · REST APIs · AWS

- Delivered a university-wide ERP for Western Pacific University, Papua New Guinea, adapting Odoo HR, inventory, and operations modules to its administrative processes.
- Connected the ERP to third-party services through REST APIs, automating data flows that were previously entered by hand.
- Host the live systems on AWS EC2 with S3 storage and automated deployment pipelines.

Workshiftly — SaaS HR Management Platform

React.js · Node.js · MariaDB

- Led a system-wide frontend architecture revamp in React.js, improving cross-browser rendering speed and Core Web Vitals.
- Optimized secure media upload and processing pipelines for multi-format document storage and faster file lookups.
- Built high-throughput tabular report export scripts handling complex MariaDB dataset serialization.

HCIM Pulse — HR Management Web Application

React.js · Redux · Node.js · MariaDB

- Designed an interactive analytics dashboard that consolidates workforce metrics behind lightweight, cached API endpoints.
- Implemented dynamic, schema-agnostic CRUD operations on custom relational models to extend schema flexibility.
- Built asynchronous report and analytics generation, offloading heavy processing from the browser main thread.

EDUCATION

BSc in Physical Science — University of Kelaniya 2018 – 2021

Computer Science, Pure Mathematics, Applied Mathematics · GPA 3.68 / 4.00 (Second Class Upper Division)

STRENGTHS

Effective Communication · Problem-Solving · Critical Thinking · Time Management · Ownership & Accountability
